journal of MEMBRANE SCIENCE

Subject index

Active transport, 101
Alcohol permselective membrane, 23
Ammonia removal, 93
Arginine, 73, 83
Asymmetric membrane, 215
ATR-FTIR, 223

Case-II transport, 267
Cellulose acetate membranes, 235
Ceramic membranes, 119
Charges membrane, 223
Chlorine, 171
Chromium, 1
Concentration profiles, 185
Controlled release, 245
Coulter porosimetry, 119
Crosslinking, 23
Cyclodextrins, 111

Deactivation, 171
Diafiltration, 257
Diffusion, 245
Diffusion coefficient, 111
Distillation, 51
Drug delivery system, 267
Drug permeability, 245

Efficiency, 51
Electrodialysis, 73, 83
Electrotransport, 83
Ethanol, 185
External forces, 279
Extraction, 1

Fickian diffusion, 267

Gas membrane, 93
Gelation, 215

Heavy metals, 257
Hydrogen permeation, 171

Ion-exchange membrane, 73, 83
Ionic strength, 223

Irreversible thermodynamics, 279

Kapton®, 131

Latex membrane, 9
Liquid membrane, 101

Mass transfer, 93, 235
Maxwell–Stefan theory, 153
Mechanical equilibrium, 279
Mechano-chemical potential, 279
Membrane cascades, 51
Membrane desorption–absorption, 93
Membrane distillation, 93
Membrane preparation and structure, 9
Mercury porosimetry, 119
Methylcyclohexane, 171
Microcapsules, 1
Microencapsulation, 1
Microfiltration, 199
Microporous and porous membranes, 37
Mixture solubilities, 143
Modified polybutadiene, 23

Nanofiltration, 235

One-compressor permeators, 51
Oxygen sorption, 131
Oxygen transport, 131

Pd–Ag membrane, 171
Permeation method, 119
Permselectivity, 23
Pervaporation, 9, 23, 111, 143, 153, 185
Phase inversion process, 215
Photochromic, 101
Poisoning, 73, 83
Polybutadiene, 23
Polyimide, 131
Poly(*N*-isopropylacrylamide-co-butylmethacrylate) gel, 267
Polymeric membrane, 23
Polysulfone, 215
Polyurea, 1
Poly(vinyl alcohol), 111

1994 Elsevier Science B.V.

Poly(vinyl alcohol) membrane, 143, 153
Polyvinylimidazole, 223
Pore flow model, 153
Protein, 223

Regeneration, 171
Reverse osmosis, 235

Separation stages, 51
Sigmoidal swelling, 267
Silicalite, 185
Silicone rubber, 185
Skin, 245
Sorption equilibrium, 111
Steric pore flow model, 235
Sulphur, 171

Theory, 199, 257
Thermodynamics, 37
Transdermal delivery systems, 245
Transport, 73
Transport theory, 153
Triaryl cation, 101

Ultrafiltration, 235, 257
UNIQUAC theory, 143

Virtual displacement, 279

Water, 131, 185
Water sorption and diffusion, 9
